Vol. 19, Issue 3. pages 83-122  
march 2001

Hello,  
I was hoping to find out what the exact date was that this particular journal issue would have become available to the public.

I am trying to beat a filing date of 3/23/01 and cannot determine from the website when this was available.

When did our library receive this?

thank you very much

jon

Cover picture: on pp. 102-108, Fumiyoshi Abe and Koki Horikoshi discuss the biotechnological potential of piezophiles. The authors expect that research into understanding the effects of pressure on biochemical and biophysical reactions will lead to the development of new industrial applications for piezophiles. Cover idea by Fumiyoshi Abe, design by Geraldine Woods and 3D imaging by Jamie Oliver.
